

OEM/ODM Aluminum Anodizing Part - Computer Numerical Control Parts

Our Product Introduction

For more products please visit us on lathecnmachining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Certification: IATF 16949: 2016/ISO 9001:2015
- Model Number: OEM
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Surface Treatment: Anodizing, Polishing, Plating, Painting
- Tolerance: $\pm 0.005\text{mm}$
- Equipment: 3/4/5 Axis Center Machining
- Drawing Format: 2D/(PDF/CAD)3D(IGES/STEP)
- Micro Machining Or Not: Micro Machining
- CNC Machining Or Not: Cnc Machining
- MOQ: 1 Piece
- Highlight: **OEM Aluminum Anodizing Part,
ODM Aluminum Anodizing Part**

Product Description

Product Description:

Our Product Introduction

CNC Lathe Machine Parts are computerized machining parts, which are custom-made with high precision CNC machining technologies. They can be manufactured with multiple machining processes such as broaching, drilling, etching, chemical machining, laser machining, milling, rapid prototyping, turning, and wire EDM. With the MOQ of 1 piece, these CNC lathe parts are widely used in a variety of applications due to their excellent dimensional accuracy and high-end surface treatments, such as anodizing, polishing, plating, and painting.

These CNC lathe parts are highly durable and reliable, making them the perfect choice for a variety of applications. Their superior design, high-precision machining, and superior surface treatments make them a long-lasting and reliable solution for many industries. With the help of CNC lathe machine parts, you can achieve the highest level of accuracy and efficiency, making them ideal for high-end projects. At XYZ Company, we specialize in providing high-precision CNC Lathe Machine Parts with superior quality standards. Our experienced team of experts is dedicated to providing the best parts to meet your specific requirements. With our state-of-the-art machinery and advanced technologies, we can create customized CNC lathe parts for your specific needs. We are committed to providing our customers with the best service and products.

Features:

Product Name: **CNC Lathe Machine Parts**

Equipment: 3/4/5 Axis Center **Computerized Machining**

Micro Machining or Not: **Micro Machining**

OEM/ODM: OEM ODM **CNC Milling Turning Machining Service**

Surface Roughness: Ra 0.1~3.2, As Requirement

Certification: IATF 16949: 2016/ISO 9001:2015

Technical Parameters:

Product Attributes	Details
Certification	IATF 16949: 2016/ISO 9001:2015
Equipment	3/4/5 Axis Center Machining
Surface Roughness	Ra 0.1~3.2, As Requirement
Micro Machining or Not	Micro Machining
Type	Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Rapid Prototyping, Turning, Wire EDM
OEM/ODM	OEM ODM CNC Milling Turning Machining Service
Model Number	OEM Customized Metal Parts Machining
Surface treatment	Anodizing, Polishing, Plating, Painting
Tolerance	+/-0.005mm
MOQ	1 Piece
Special Note	Computerized Lathe Parts, Computerized Machining Parts, Computer Numerical Control Parts

Applications:

OEM/ODM Aluminum Anodizing Part is designed for Computerized Lathe Parts, CNC Machining Components and CNC Machining Parts. It is made of high quality materials and has advanced technology for precise machining. The process involves 3/4/5 Axis Center Machining with CNC Machining for perfect accuracy. The surface treatment ensures the corrosion resistance and durability of the parts. OEM/ODM Aluminum Anodizing Part is ideal for applications in industrial machinery, medical, aerospace, automotive, and other fields that require precision machining and reliable performance.

The durable and corrosion resistant properties of OEM/ODM Aluminum Anodizing Part make it extremely useful in a variety of industries, from automotive to aerospace to medical. Its precise CNC Machining and 3/4/5 Axis Center Machining processes enable it to deliver reliable performance, and its surface treatments ensure that it can handle intense operating environments.

OEM/ODM Aluminum Anodizing Part offers a high level of precision and accuracy in CNC machining parts. It is ideal for high-precision machining of various types of components, including complex parts, thin-walled parts, and parts with complex contours. It is also suitable for machining of a variety of materials, such as aluminum, stainless steel, and titanium.

In addition, OEM/ODM Aluminum Anodizing Part is an ideal solution for applications that require high-precision and reliable performance. Its advanced machining technology and corrosion resistance make it suitable for a wide range of industrial applications, including automotive, aerospace, medical, and other industries.

Customization:

Industrial Man OEM Customized Metal Parts Machining CNC Lathe Parts

Brand Name: Industrial Man

Model Number: OEM Customized Metal Parts Machining

Place of Origin: Guangdong, China

MOQ: 1 Piece

Surface Roughness: Ra 0.1~3.2, As Requirement

Surface treatment: Anodizing, Polishing, Plating, Painting

Equipment: 3/4/5 Axis Center Machining

Usage: Computerized Machining Parts, CNC Machining Parts, CNC Lathe Parts, CNC Machining Components

Support and Services:

CNC Lathe Machine Parts Technical Support and Service

We are dedicated to providing our customers with the highest quality of technical support and service for their CNC Lathe Machine Parts. Our team of experienced technicians and engineers can help you troubleshoot any issue you may have with your CNC Lathe Machine Parts.

We provide telephone, email, and on-site support for our CNC Lathe Machine Parts. Our technicians and engineers can help you diagnose and resolve any issues you may have. We also provide preventive maintenance and regular maintenance services to ensure your CNC Lathe Machine Parts are running optimally.

We also offer free technical support for our CNC Lathe Machine Parts. Our technicians and engineers are available to answer any questions you may have about the installation, operation, and maintenance of your CNC Lathe Machine Parts. We also provide free software updates and upgrades to ensure your CNC Lathe Machine Parts are up-to-date with the latest technology. For more information on our CNC Lathe Machine Parts technical support and service, please contact us today.

Packing and Shipping:

Packaging and Shipping CNC Lathe Machine Parts

CNC Lathe Machine Parts should be securely packed in a cardboard or wooden box to prevent any damage during transport. All components must be properly labelled and wrapped in bubble wrap or packing peanuts to ensure that they are protected and do not move around during shipping. The exterior of the box should be clearly marked with the destination address.

It is important that the CNC Lathe Machine Parts are shipped in a timely manner. Depending on the size and weight of the parts, they should be shipped either by air, ground or sea. For international orders, the parts should be sent by air or sea. The carrier should provide tracking information and the package should be insured in case of any loss or damage during shipping.

FAQ:

Q: What is the brand name of the CNC Lathe Machine Parts?

A: The brand name is Industrial Man.

Q: What is the model number of the CNC Lathe Machine Parts?

A: The model number is OEM.

Q: Where is the CNC Lathe Machine Parts manufactured?

A: The CNC Lathe Machine Parts is manufactured in Guangdong, China.

Q: What type of materials are used in the CNC Lathe Machine Parts?

A: The CNC Lathe Machine Parts is made of high-quality metals and alloys.

Q: How long is the warranty for the CNC Lathe Machine Parts?

A: The CNC Lathe Machine Parts comes with a one-year limited warranty.
