

Customized Metal Parts Machining CNC Machining Components for Industrial Applications

Our Product Introduction

For more products please visit us on lathecnrmachining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: OEM/ODM Aluminum Anodizing Part
- Certification: IATF 16949: 2016/ISO 9001:2015
- Model Number: OEM Customized Metal Parts Machining
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Surface Roughness: Ra 0.1~3.2, As Requirement
- Drawing Format: 2D/(PDF/CAD)3D(IGES/STEP)
- OEM/ODM: OEM ODM CNC Milling Turning Machining Service
- Surface Treatment: Anodizing, Polishing, Plating, Painting
- Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Rapid Prototyping, Turning, Wire EDM
- Highlight: Customized Metal Parts Machining, Industrial Applications Metal Parts Machining, Industrial Applications CNC Machining Components

Product Description

Product Description:

Our Product

CNC Lathe Machine Parts are custom machining parts produced by CNC machining and computerized machining, based on OEM and ODM services. These CNC machining components are produced with precision and accuracy by our advanced CNC lathe machines and with surface treatment like anodizing, polishing, plating and painting. All CNC lathe parts are manufactured according to IATF 16949: 2016/ISO 9001:2015, ensuring high quality and standards. Furthermore, these custom machining parts are also capable of micro machining.

Features:

Product Name: **CNC Lathe Machine Parts**

Surface Roughness: Ra 0.1~3.2, As Requirement

Process: **Cnc Machining** + Surface Treatment

Place of Origin: Guangdong, China

Certification: IATF 16949: 2016/ISO 9001:2015

MOQ: 1 Piece

Specialized in: **Computer Numerical Control Parts, Computerized Lathe Parts**

Technical Parameters:

Product Attributes	Details
OEM/ODM	OEM ODM CNC Milling Turning Machining Service
CNC Machining or Not	CNC Machining
Micro Machining or Not	Micro Machining
Certification	IATF 16949: 2016/ISO 9001:2015
Surface Treatment	Anodizing, Polishing, Plating, Painting
Drawing Format	2D/(PDF/CAD)3D(IGES/STEP)
Type	Broaching, DRILLING, Etching/Chemical Machining, Laser Machining, Milling, Other Machining Services, Rapid Prototyping, Turning, Wire EDM
Model Number	OEM Customized Metal Parts Machining
Place of Origin	Guangdong, China
Brand Name	OEM/ODM Aluminum Anodizing Part
Keywords	Computer Numerical Control Parts, CNC Lathe Parts, CNC Machining Components

Applications:

CNC Lathe Machine Parts are widely used in a variety of industries and applications that require precision machining services. The parts are made using Computer Numerical Control (CNC) machining technology, which ensures that each component is machined with high accuracy and consistent quality. The parts are available in different materials, including aluminum, stainless steel, and plastic. Moreover, they can be customized according to customer requirements in terms of size, shape, surface finish, and other specifications. The Brand Name of these parts is OEM/ODM Aluminum Anodizing Part and the Model Number is OEM. These parts are manufactured from Guangdong, China, and they can be machined on 3/4/5 Axis Center Machines. The surface roughness of the parts can be as low as Ra 0.1 and can also be as high as Ra 3.2, as per the customer requirements. Moreover, these parts can be machined using a variety of processes such as broaching, drilling, etching/chemical machining, laser machining, milling, turning, and wire EDM.

These CNC Lathe Machine Parts are used for a wide range of applications, from automotive and aerospace to medical and consumer electronics. They are highly reliable and can be used for precision parts and instruments, such as medical equipment, cameras, and other electronics. These parts are also used in the production of components for machines such as CNC mills and lathes, and they are ideal for making highly precise and complex shapes. As a result, CNC machining components are used in almost all industries, from consumer products to large-scale manufacturing.

The CNC Lathe Machine Parts are made using highly advanced CNC machining technology, which ensures that each component is machined with extreme accuracy and quality. With the help of computer numerical control parts, customers can get the perfect shape and size of parts for their machines and products. Furthermore, CNC computerized lathe parts are extremely durable and can withstand high temperatures and temperatures. Hence, these parts are ideal for making complex and intricate parts for a variety of applications.

Customization:

Customized CNC Lathe Machine Parts by Industrial Man

Industrial Man provides computerized lathe parts, computerized machining parts, and CNC machining components with customized services for CNC Lathe Machine Parts.

Brand Name: Industrial Man

Model Number: OEM

Place of Origin: Guangdong, China

Equipment: 3/4/5 Axis Center Machining

Surface treatment: Anodizing, Polishing, Plating, Painting

Process: Cnc Machining + Surface Treatment

CNC Machining or Not: Cnc Machining

Surface Roughness: Ra 0.1~3.2, As Requirement

Support and Services:

We provide technical support and services for CNC Lathe Machine Parts. Our team of experienced engineers will work with you to ensure that your product is running optimally, and that any problems or issues that may arise are fixed quickly and efficiently. We will provide technical advice and troubleshooting, as well as replacement parts or upgrades if needed. We can also provide onsite installation and

maintenance for your CNC Lathe Machine Parts.

Packing and Shipping:

Packaging and Shipping for CNC Lathe Machine Parts:

Parts are placed in specialised boxes and wrapped with bubble wrap.

Boxes are placed in strong cardboard boxes and sealed with double-sided tape.

Boxes are then placed on pallets and secured with straps.

Pallets are then transported using a truck or air freight.

FAQ:

Q1: What is the brand name of the CNC Lathe Machine Parts?

A1: The brand name of the CNC Lathe Machine Parts is Industrial Man.

Q2: What is the model number of the CNC Lathe Machine Parts?

A2: The model number of the CNC Lathe Machine Parts is OEM.

Q3: Where is the CNC Lathe Machine Parts from?

A3: The CNC Lathe Machine Parts is from Guangdong, China.

Q4: What are the main materials of the CNC Lathe Machine Parts?

A4: The main materials of the CNC Lathe Machine Parts are stainless steel, aluminum alloy, copper, and plastic.

Q5: What is the size range of the CNC Lathe Machine Parts?

A5: The size range of the CNC Lathe Machine Parts is from 1 mm to 1500 mm.
