

Custom Precision Aerospace CNC Machining Parts For Automotive Medical

Our Product Introduction

For more products please visit us on lathecnmachining.com

Basic Information

- Place of Origin: Guangdong, Shenzhen
- Brand Name: Industrial Man
- Certification: IATF 16949: 2016/ISO 9001:2015
- Model Number: OEM
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 3-5 Days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- OEM/ODM: Accepted
- Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
- Surface Treatment: Customer's Request
- MOQ: 1 Piece
- Sample: Available
- Highlight: Custom aerospace cnc machining,
Precision aerospace cnc machining,
Aerospace cnc precision parts

Product Description

Product Description:

Our Product

INDUSTRIAL-MAN is a professional CNC machining metal parts manufacturer and supplier, offering high precision CNC lathe turning parts and precision turning parts to meet customer's various needs. We have advanced CNC machining equipment, the 3/4/5 axis center machining. Our products are strictly certified by IATF 16949: 2016/ISO 9001:2015, and the samples are available.

We provide CNC machining, CNC lathe turning, CNC milling and other services, including drilling, tapping, chamfering, grinding, threading, knurling and so on. We have experienced engineers, advanced technology, and strict quality control system to ensure the high quality of our CNC machining metal parts. The surface treatment options are available to meet customer's request.

Our CNC lathe turning parts and precision turning parts are widely used in automotive, medical, aerospace, defense, telecommunications and other industries. If you have any needs about CNC machining metal parts, please contact us and we will provide you with the best solution.

Features:

Product Name: CNC Turning Machining Parts

Material Capabilities: Aluminum, Brass, Bronze, Copper, Hardened Metals, Precious Metals, Stainless Steel, Steel Alloys

Tolerance: 0.01- +/-0.005mm

OEM/ODM: Accepted

Drawing Format: STP . STEP . IGS . PRT . X_T

CNC Machining Auto Parts

CNC Machining Turning Parts

CNC Machining Metal Parts

Technical Parameters:

Property	Value
Brand Name	INDUSTRIAL-MAN
Certification	IATF 16949: 2016/ISO 9001:2015
Place of Origin	Guangdong,Shenzhen
OEM/ODM	Accepted
Micro Machining or Not	Micro Machining
Surface treatment	Customer's Request
Sample	Available
Equipment	3/4/5 Axis Center Machining
CNC Machining or Not	CNC Machining
Product	5 Axis CNC Machining Parts, CNC Machining Turning Parts, CNC Machining Metal Parts
MOQ	1 Piece

Applications:

Industrial Man's CNC Turning Machining Parts are the ideal choice for precision machining and manufacturing. Our CNC Turning Machining Parts are made from the highest quality materials, and meet stringent quality standards. With our 5 Axis CNC Machining Parts, CNC Machining Turning Parts, and CNC Lathe Turning Parts, you can be sure that you are getting the best parts for your application. Our CNC Turning Machining Parts are available in a wide range of materials including aluminum, brass, bronze, copper, hardened metals, precious metals, stainless steel, and steel alloys. We offer a variety of machining services including broaching, drilling, etching/chemical machining, laser machining, milling, other machining services, turning, wire EDM, and rapid prototyping. Our parts are designed to meet the tightest tolerances, with a tolerance of 0.01- +/-0.005mm. All of our CNC Turning Machining Parts are designed to provide the highest degree of accuracy and performance.

Customization:

Custom CNC Turning Machining Parts from Industrial Man

Industrial Man offers custom CNC turning machining parts with 5 axis CNC machining metal parts. Our CNC machining service is available for a wide range of industries, including aerospace, construction, automotive, and more. Our services include a variety of custom machining services such as: broaching, drilling, etching/chemical machining, laser machining, milling, other machining services, turning, wire EDM, and rapid prototyping.

Our custom CNC turning machining parts are made to customer specifications with the highest quality standards and materials. We can provide a variety of surface treatments, from anodizing, plating, and powder coating to polishing and grinding. Our CNC turning machining parts are designed and manufactured to meet the most rigorous requirements.

For custom CNC turning machining parts, Industrial Man has a minimum order quantity of 1 piece. We accept drawing formats such as STP, STEP, IGS, PRT, and X_T.

We understand that our customers' needs are unique and we always strive to provide the highest quality service. Contact us today to get a quote and to learn more about our custom CNC turning machining parts.

Support and Services:

We provide technical support and service for CNC Turning Machining Parts. Our technical support team is available 24/7. We provide online and onsite technical support and troubleshooting for our products. Our experts can help you with installation, configuration, and operation of CNC Turning Machining Parts. We also provide maintenance and repair services, with both onsite and online support. If you have any problems with our products, you can contact us and one of our experts will be happy to assist you.

Packing and Shipping:

Packaging and Shipping of CNC Turning Machining Parts:

The parts will be packed in sturdy cardboard boxes, with foam or bubble wrap to protect them during transportation.

The boxes will be sealed with adhesive tape or plastic strapping.

The parts will be shipped via air or sea freight, depending on the customer's requirements.

The parts will be tracked and insured during shipping.

FAQ:

Q1: What is CNC Turning Machining Parts?

A1: CNC Turning Machining Parts is a manufacturing process in which a metal rod is rotated and cut into a desired shape and size. It is provided by Industrial Man with model number OEM and origin from Guangdong, China.

Q2: What materials can be used with CNC Turning Machining Parts?

A2: CNC Turning Machining Parts can be used with a variety of materials including aluminum, steel, brass, and plastics.

Q3: What is the process of CNC Turning Machining Parts?

A3: During the CNC Turning Machining Parts process, a cutting tool is used to shape the material by removing material from the rotating metal rod. The cutting tool is then moved to the desired location and the process is repeated.

Q4: What are the advantages of CNC Turning Machining Parts?

A4: CNC Turning Machining Parts provides accuracy, repeatability, high speed, and low cost compared to other machining processes. It also offers high levels of automation and can produce complex parts with tight tolerances.

Q5: Where can I buy CNC Turning Machining Parts?

A5: CNC Turning Machining Parts is provided by Industrial Man with model number OEM and origin from Guangdong, China. You can contact the supplier for more information.
