

Engineering Plastic SLA SLS 3D Printing Gaming Miniatures ODM

Our Product Introduction

For more products please visit us on lathecnmachining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Certification: ISO 9001:2015
- Model Number: Custom Prototype Model
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Drawing Format: 2D/(PDF/CAD)3D(IGES/STEP)
- Product Name: Custom Prototype Model 3D Printing
- Micro Machining Or Not: Micro Machining
- Material: Photosensitive Resins
- MOQ: 1 Piece
- Logo: Accept Custom Logo
- Highlight: **engineering plastic SLA SLS 3D Printing,
ODM SLA SLS 3D Printing,
ODM 3d printing gaming miniatures**

Product Description

Product Description:

Our Product

SLA SLS 3D Printing: Custom Prototype Model 3D Printing with Photosensitive Resins

SLA SLS 3D Printing offers a comprehensive range of 3D printing post processing machines and custom 3D printing services, with photosensitive resins, engineering plastics, metals, ceramics, and rubber materials. Our 3D printing rapid prototyping services provide custom prototype model 3D printing with a minimum order quantity of 1 piece. We also accept custom logo for your 3D printing needs. Our state-of-the-art 3D printing post processing machines use the latest technology, offering exceptional accuracy and durability. You can also customize your 3D printing requirements with our custom 3D printing services. Whether you need a one-off prototype model or a large volume of 3D prints, we offer a range of 3D printing rapid prototyping services that are tailored to meet your needs.

At SLA SLS 3D Printing, we specialize in providing high-quality 3D printing post processing machines and custom 3D printing services. Our 3D printing rapid prototyping services use photosensitive resins, engineering plastics, metals, ceramics, and rubber materials to create custom prototype models with a minimum order quantity of 1 piece. Customers can also customize their 3D printing needs with our custom logo and color options.

For superior 3D printing post processing machines and custom 3D printing services, trust SLA SLS 3D Printing to provide you with the best 3D printing rapid prototyping services. Our custom prototype models are crafted with attention to detail and accuracy, and are available in a wide range of colors and materials.

Features:

Product Name: SLA SLS 3D Printing

Logo: Accept Custom Logo

Color: Photosensitive Resins, Engineering Plastics, Metals, Ceramics, Rubber

Model Number: Custom Prototype Model

Micro Machining or Not: Micro Machining

Material: Photosensitive Resins

Industrial SLA 3D Printer

3D Lenticular Printing Service

Industrial SLS 3D Printer

Technical Parameters:

Parameter	Value
Brand Name	Shenzhen Industrial Man
Drawing Format	2D/(PDF/CAD)3D(IGES/STEP)
Logo	Accept Custom Logo
Tolerance	0.01-0.05mm
Material	Photosensitive Resins
Certification	ISO 9001:2015
MOQ	1 Piece
Size	Customer's 3D Drawing
Product name	Custom Prototype Model 3D Printing
Micro Machining or Not	Micro Machining
Other Services	Custom 3D Printing Services, Industrial Plastic 3D Printer, 3D Lenticular Printing Service

Applications:

Shenzhen Industrial Man's Custom Prototype Model 3D Printing provides a variety of applications and scenes for customers. With ISO 9001:2015 certification and a tolerance of 0.01-0.05mm, this industrial SLA 3D printer brings users accurate and reliable 3D printing services. It is suitable for large-scale industrial production and post-processing, and can provide users with high-precision printing solutions. This industrial SLA 3D printer provides a high-performance platform for users to create a variety of complex and precise 3D models. It is also equipped with the latest 3D printing post-processing machines to ensure that users can quickly and accurately produce the desired products. It is widely used in various industries such as automotive, medical, aerospace, and consumer electronics. The Custom Prototype Model 3D Printing also provides a variety of materials such as plastics, rubber, metals, and ceramics, so that users can easily find the right material for their 3D printing projects. With its reliable and accurate printing capabilities, Shenzhen Industrial Man's Custom Prototype Model 3D Printing is a great choice for anyone looking for a high-performance and reliable 3D printing solution.

Customization:

Industrial Man OEM 3D Printing Service

Industrial Man provides personalized 3D printing services to meet your specific needs. Our service includes 3D printing using photosensitive resins, engineering plastics, metals, ceramics, rubber and titanium alloy. All our 3D printing services are available with custom logo and drawing format (2D/PDF/CAD, 3D/IGES/STEP). We also offer post processing machines for 3D printing.

MOQ: 1 Piece

Highlighted Materials

Photosensitive Resins

Engineering Plastics

Metals

Ceramics

Rubber

Titanium Alloy

Place of Origin

Guangdong, China

Support and Services:

SLA SLS 3D Printing provides technical support and services to ensure the best performance of the product. Our technical support team is available 24/7 and provides a wide range of assistance, including:

Online help center

Live chat support

Telephone support
Email support
On-site service
Remote access support
Software updates
Hardware maintenance

Packing and Shipping:

Packaging and Shipping for SLA SLS 3D Printing

The 3D printing products will be packaged in a box with padding to protect against any damage during shipping.

The box will be labelled clearly with the sender and receiver's address.

The box will be shipped via the most economical carrier to ensure the fastest possible delivery time.

The shipping cost will be the responsibility of the customer.

FAQ:

Q1: What is SLA SLS 3D Printing?

A1: SLA SLS 3D Printing is a type of 3D printing technology that uses a digital light projector to cure liquid resin and create 3D objects. The Industrial Man OEM 3D printer is a high-precision, automated SLA/SLS 3D printing system designed to produce complex, accurate parts with superior surface finish.

Q2: What are the benefits of Industrial Man OEM SLA SLS 3D Printing?

A2: Industrial Man OEM SLA SLS 3D Printing offers a variety of advantages compared to other 3D printing technologies. It is capable of producing components with high accuracy, superior surface finish and high resolution. It is also capable of producing complex geometries and fine details that are difficult to achieve with other 3D printing technologies.

Q3: What materials can be used with Industrial Man OEM SLA SLS 3D Printing?

A3: Industrial Man OEM SLA SLS 3D Printing is capable of printing with a variety of materials, including resin, nylon, polycarbonate, and ABS. It is also capable of printing with a wide range of specialty materials, including metal, wood-based, and ceramic materials.

Q4: What is the accuracy of Industrial Man OEM SLA SLS 3D Printing?

A4: The Industrial Man OEM SLA SLS 3D printer is capable of producing parts with a layer resolution of 0.05 mm and an accuracy of ± 0.1 mm.

Q5: Where is the Industrial Man OEM SLA SLS 3D Printer made?

A5: Industrial Man OEM SLA SLS 3D Printer is made in Guangdong, China. It is designed and manufactured to the highest standards of quality and reliability.
