

Industrial Plastic Resin SLA SLS 3D Printing Micro Machining

Our Product Introduction

For more products please visit us on lathecnmachining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Shenzhen Industrial Man
- Certification: ISO9001:2015
- Model Number: Custom Prototype Model
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Material: Photosensitive Resins
- Logo: Accept Custom Logo
- MOQ: 1 Piece
- Micro Machining Or Not: Micro Machining
- Product Name: Custom Prototype Model 3D Printing
- Color: Photosensitive Resins, Engineering Plastics, Metals, Ceramics, Rubber
- Highlight: **Plastic SLA SLS 3D Printing,
Industrial SLA SLS 3D Printing,
sla resin printing Machining**

Product Description

Product Description:

Our Product

Shenzhen Industrial Man Custom Prototype Model 3D Printing Rapid Prototyping Services

Shenzhen Industrial Man provides the highest quality 3D printing rapid prototyping services, utilizing the latest 3D printing technology with a tolerance of 0.01-0.05mm for custom prototype model. Our 3D printing service uses photosensitive resins and titanium alloy to produce parts with high accuracy and consistency. Our 3D lenticular printing service allows customers to meet their unique needs. We guarantee the highest quality of our 3D printing services, certified with ISO 9001:2015.

Features:

Product Name: SLA SLS 3D Printing

Size: Customer's 3D Drawing

Tolerance: 0.01-0.05mm

Material: Photosensitive Resins

Brand Name: Shenzhen Industrial Man

Micro Machining or Not: Micro Machining

Special Features: 3D Lenticular Printing Service, Custom 3D Printing Services, 3D Printing Titanium Alloy

Technical Parameters:

Product Attributes	Details
Size	Customer's 3D Drawing
Brand Name	Shenzhen Industrial Man
Drawing Format	2D/(PDF/CAD)3D(IGES/STEP)
Logo	Accept Custom Logo
Product Name	Custom Prototype Model 3D Printing
Certification	ISO 9001:2015
Tolerance	0.01-0.05mm
Color	Photosensitive Resins, Engineering Plastics, Metals, Ceramics, Rubber
Material	Photosensitive Resins
MOQ	1 Piece
3D Printing Titanium Alloy	Yes
3D Printing Post Processing Machines	Yes

Applications:

SLA SLS 3D Printing Applications & Scenes by Shenzhen Industrial Man

Shenzhen Industrial Man provides custom 3D printing services and 3D printing rapid prototyping services for various applications and scenes. SLA SLS 3D printing technology is used to 3D print models in photosensitive resins, engineering plastics, metals, ceramics, and rubber with custom logo and color. Our custom prototype model is specifically designed for 3D printing titanium alloy.

The application and scenes of SLA SLS 3D printing technology are extensive and cover a wide range of industries. We provide 3D printing solutions for medical, automotive, aerospace, consumer goods, industrial goods, and other fields. We can precisely 3D print small medical parts, automotive components, aerospace components, consumer goods, industrial goods, and even complex geometries with high accuracy.

Our SLA SLS 3D printing technology is ideal for creating custom 3D printed parts with different materials and colors. We accept drawing formats such as 2D/PDF/CAD, 3D/IGES/STEP, and can produce products with high quality and accuracy. We can also customize the logo according to the customer's needs.

SLA SLS 3D printing technology is a great way to increase efficiency and reduce costs for any industry. It helps to create custom parts with complex geometries and time-consuming processes. With our 3D printing services, you can make rapid prototypes and save time and money.

Customization:

Industrial Man Custom Prototype Model 3D Printing

Brand Name: Industrial Man

Model Number: Custom Prototype Model

Place of Origin: Guangdong, China

Product name: Custom Prototype Model 3D Printing

Micro Machining or Not: Micro Machining

Certification: ISO 9001:2015

Size: Customer's 3D Drawing

Industrial Plastic 3D Printer: Yes

3D Printing Post Processing Machines: Yes

3D Lenticular Printing Service: Yes

Support and Services:

SLA SLS 3D Printing provides technical support and services to help customers and users to get the most out of their 3D printing experience. Our technical support and services include:

Providing help and advice on installation and setup of 3D printers.

Assisting with troubleshooting and resolving hardware and software issues.

Answering questions about 3D printing processes, materials and techniques.

Providing advice on the selection of 3D printing systems and materials.

Providing training and education on 3D printing operations.

Providing support for maintenance and repair of 3D printers.

Providing guidance on building and maintaining 3D printing networks.

Packing and Shipping:

Packaging and Shipping for SLA SLS 3D Printing

The SLA SLS 3D Printing will be carefully packaged with bubble wrap and cardboard boxes to ensure that it reaches you in perfect condition. The item will be shipped by a reliable and trusted courier service, and tracking information will be provided for added convenience.

FAQ:

Q1. What is Industrial Man's SLA SLS 3D Printing?

A1. Industrial Man's SLA SLS 3D Printing is a 3D printing technology that uses a laser to selectively cure a liquid resin to create 3D printed parts with high resolution and accuracy.

Q2. What is the model number of Industrial Man's SLA SLS 3D Printing?

A2. Industrial Man's SLA SLS 3D Printing model number is OEM.

Q3. Where is Industrial Man's SLA SLS 3D Printing manufactured?

A3. Industrial Man's SLA SLS 3D Printing is manufactured in Guangdong, China.

Q4. What materials can be used with Industrial Man's SLA SLS 3D Printing?

A4. Industrial Man's SLA SLS 3D Printing can be used with a variety of materials, including resins, polymers, and metals.

Q5. What are the advantages of Industrial Man's SLA SLS 3D Printing?

A5. Industrial Man's SLA SLS 3D Printing offers high resolution and accuracy, fast production times, and low cost of ownership.
