

Etching Polycarbonate Plastic Injection Molding Service Custom

Our Product Introduction

For more products please visit us on lathecnm machining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Certification: ISO9001:2015
- Model Number: OEM
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-30 work days
- Payment Terms: L/C,D/A,D/P,T/T,Western Union,MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Color: Up To Your Decision
- Micro Machining Or Not: Micro Machining
- Surface Treatment: Polishing, Painting, Anodizing, Silkscreen, Sandblasting, Texture
- Application: Prototype Development, Low-Volume Production & Rapid Tooling
- Keyword: Automotive, Medical, Digital Prototyping, Appliance Prototyping
- Tolerance: 0.01
- Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
- Highlight: **Etching Plastic Injection Molding Service, Polycarbonate Plastic Injection Molding Service**

Product Description

Product Description:

Our Product Introduction

Plastic Injection Molding Service is a custom plastic injection molding service that specializes in creating custom plastic parts with a variety of materials and surface treatments. It is a general purpose injection molding system, allowing customers to create parts in various shapes and sizes, with a range of metal materials such as aluminum, brass, bronze, copper, and steel. The service offers an array of surface treatments, including polishing, painting, anodizing, silkscreen, sandblasting, and texture, to create the desired finish. The plastic injection molding service also provides a range of machining services, such as broaching, drilling, etching/chemical machining, laser machining, milling, turning, wire EDM, and rapid prototyping. It also manufactures general purpose injection molding systems for different sheet metal automotive stamping machining. This comprehensive service allows customers to create custom plastic parts that meet their precise requirements.

Features:

Product Name: Plastic Injection Molding Service

Place of Origin: Guangdong, China

Micro Machining or Not: Micro Machining

Metal Material: Aluminum, Brass, Bronze, Copper, Steel...

Tolerance: 0.01

Brand Name: Industrial Man

High Precision Plastic Injection Molding

Custom Plastic Injection Mold

General Purpose Injection Molding System

Technical Parameters:

Type	Keyword
Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping	Automotive, Medical, Digital Prototyping, Appliance Prototyping
Place of Origin	Brand Name
Guangdong, China	Industrial Man
Color	Metal Material
Up To Your Decision	Aluminum, Brass, Bronze, Copper, Steel...
Name	Tolerance
Plastic Injection Molding Service	0.01
Model Number	Micro Machining or Not
Sheet Metal Automotive Stamping Machining	Micro Machining
Injection Mold Tooling	Custom Plastic Injection Mold
Yes	Yes
Injection Molded Plastic Parts	
Yes	

Applications:

Industrial Man's Custom Plastic Injection Molding Service is designed to offer a wide range of products for automotive, medical, digital prototyping, and appliance prototyping applications. With a brand name of Industrial Man and a model number of OEM, our custom plastic injection molds are manufactured in Guangdong, China with a tolerance of 0.01. Our custom plastic injection molding services also provide micro-machining capabilities to meet the needs of any project. Our custom plastic injection molds are durable and reliable to ensure the highest quality results for your project. With our custom plastic injection molding services, you can trust that you are getting the best possible product for your needs.

Customization:

Plastic Injection Molding Service - By Industrial Man

Brand Name: Industrial Man

Model Number: OEM

Place of Origin: Guangdong, China

Metal Material: Aluminum, Brass, Bronze, Copper, Steel...

Color: Up To Your Decision

Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping

Name: Plastic Injection Molding Service

Application: Prototype Development, Low-Volume Production & Rapid Tooling

Injection Mold Engineering: Industrial Man provides expertise in Injection Mold Engineering for Plastic Injection Molding Service projects.

Support and Services:

Plastic Injection Molding Service Technical Support and Service

We offer comprehensive technical support and service for our plastic injection molding services. Our knowledgeable and experienced team is available to provide assistance in every step of the process, from product design and development to production and quality control. We can provide technical advice on the material selection, mold design, and process parameters to ensure the highest quality and efficiency. We also provide on-site technical support and troubleshooting services to ensure the smooth operation of the manufacturing process.

We strive to provide our customers with the best possible experience when it comes to plastic injection molding services. Our commitment to quality and customer satisfaction is at the heart of our operations. We are continuously expanding our services and technical support to ensure that our customers receive the best possible products and services.

Packing and Shipping:

Plastic Injection Molding Service packaging and shipping:

All products are securely packaged to ensure quality and safety during shipping.

We use high-quality packaging materials to prevent damage to the product during shipping.

We offer a variety of shipping options to meet our customer's needs.

We can ship to both domestic and international destinations.

FAQ:

Q: What is Plastic Injection Molding Service?

A: Plastic Injection Molding Service is a manufacturing process for producing parts from both thermoplastic and thermosetting plastic materials. It is a fast, cost-effective and efficient way to mass produce plastic parts with a high degree of accuracy and uniformity.

Q: What is the Brand Name of the Plastic Injection Molding Service?

A: The Brand Name of the Plastic Injection Molding Service is Industrial Man.

Q: What is the Model Number of the Plastic Injection Molding Service?

A: The Model Number of the Plastic Injection Molding Service is OEM.

Q: Where is the Place of Origin of the Plastic Injection Molding Service?

A: The Place of Origin of the Plastic Injection Molding Service is Guangdong, China.

Q: What are the benefits of using Plastic Injection Molding Service?

A: The benefits of using Plastic Injection Molding Service includes reduced labor costs, improved part accuracy, low scrap rates, reduced production time, improved part consistency and repeatability.
