

Drilling Plastic Mim Metal Injection Molding Companies Low Volume Rapid Tooling

Our Product Introduction

For more products please visit us on lathecnmachining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Certification: IATF 16949: 2016/ISO 9001:2015
- Model Number: Sheet Metal Automotive Stamping Machining
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-30 work days
- Payment Terms: L/C,D/A,D/P,T/T,Western Union,MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
- Micro Machining Or Not: Micro Machining
- Service: CNC Plastic/Metal Prototype Machining, Injection Molding Process
- Application: Prototype Development, Low-Volume Production & Rapid Tooling
- Metal Material: Aluminum, Brass, Bronze, Copper, Steel...
- Tolerance: 0.01
- Highlight: Drilling mim metal injection molding, Low Volume mim metal injection molding, Drilling plastic injection molding companies

Product Description

Product Description:

Our Product Introduction

Plastic Injection Molding Service is a professional manufacturing process used to produce high-precision and complex plastic parts. It provides customers with a cost-effective and efficient way to produce a wide range of custom plastic parts. Our injection molding services offer customers the flexibility to create parts of various sizes, shapes, and materials with a high degree of accuracy and repeatability. We utilize advanced injection molding machines and high-grade molds to produce parts that meet our customers' exact specifications. Our injection molding services are perfect for producing automotive, medical, appliance, and digital prototyping parts. Our injection molding services are capable of creating injection molded plastic parts ranging from small and intricate to large and complex. We offer a wide range of metal materials, including aluminum, brass, bronze, copper, and steel, to meet the specific needs of our customers. We specialize in injection mold tooling, custom plastic injection molding, and production of injection molded plastic parts. Our services also include CNC broaching, drilling, etching/chemical machining, laser machining, milling, turning, wire EDM, and rapid prototyping. We strive to provide our customers with superior quality plastic injection molding services and products that exceed their expectations. Our plastic injection molding services are available in our facility located in Guangdong, China. We are proud to offer our customers the best plastic injection molding service available.

Features:

Product Name: Plastic Injection Molding Service

Brand Name: Industrial Man

Name: Plastic Injection Molding Service

Color: Up To Your Decision

Keywords: Automotive, Medical, Digital Prototyping, Appliance Prototyping

Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping

High Precision Plastic Injection Molding

General Purpose Injection Molding System

Technical Parameters:

Name	Parameter
Tolerance	0.01
Service	CNC Plastic/Metal Prototype Machining, Injection Molding Process
Micro Machining or Not	Micro Machining
Surface treatment	Polishing, Painting, Andozing, Silkscreen, Sandblasting, Texture
Brand Name	Industrial Man
Keyword	Automotive, Medical, Digital Prototyping, Appliance Prototyping
Place of Origin	Guangdong, China
Metal Material	Aluminum, Brass, Bronze, Copper, Steel...
Application	Prototype Development, Low-Volume Production & Rapid Tooling
Custom Plastic Injection Mold	Yes
Injection Mold Engineering	Yes
Custom Plastic Injection Molding Service	Yes

Applications:

Industrial Man's **general purpose injection molding system** is specifically designed to produce custom plastic injection molds, injection molded plastic parts, and other components for a wide variety of industrial applications. Our **custom plastic injection mold** can be used to create a wide range of components and products, from medical instruments, consumer products, automotive parts, appliances, and even aerospace parts. We use the latest technology to ensure the highest quality and accuracy when producing our injection molded parts. Our injection molding service includes the use of high-quality materials and processes, such as **polishing, painting, andozing, silkscreen, sandblasting, texture, broaching, drilling, etching/chemical machining, laser machining, milling, other machining services, turning, wire EDM and rapid prototyping**. With our injection molding service, you can choose from a variety of colors, and you can also customize the surface treatment to meet your exact needs.

Customization:

Industrial Man offers customized **Plastic Injection Molding Service** with various options.

Brand Name: Industrial Man

Model Number: Sheet Metal Automotive Stamping Machining

Place of Origin: Guangdong, China

Keywords: Automotive, Medical, Digital Prototyping, Appliance Prototyping

Color: Up To Your Decision

Service: CNC Plastic/Metal Prototype Machining, Injection Molding Process

Injection Molded Plastic Parts: We provide high-quality injection molded plastic parts.

Injection Mold Tooling: We offer injection mold tooling services with precision.

Injection Mold Tooling Design: Our experienced engineers can provide professional injection mold tooling design services.

Support and Services:

Plastic Injection Molding Service Technical Support and Services

We provide a range of services to ensure the highest quality and performance of our products. Our experienced technical support team is available to answer any questions or concerns you have about our plastic injection molding service.

Consultation services to identify the best process for your application

Equipment installation and setup

Troubleshooting and maintenance

Material selection and testing

Design and engineering support

Mold fabrication and repair

Process optimization
Training and education

Packing and Shipping:

Packaging and Shipping for Plastic Injection Molding Service

We use appropriate packaging materials to protect the plastic injection molds during shipping. The packaging materials used depend on the size and type of the plastic molds. Generally, we use a combination of foam, wooden boards, and plastic to ensure that the molds are not damaged during transit.

For international shipping, we use reliable international logistics providers such as DHL, Fedex, and UPS. We also provide door-to-door delivery services for our customers.

FAQ:

Q: What is the brand name of Plastic Injection Molding Service?

A: The brand name of Plastic Injection Molding Service is Industrial Man.

Q: What is the model number of Plastic Injection Molding Service?

A: The model number of Plastic Injection Molding Service is OEM.

Q: Where is Plastic Injection Molding Service produced?

A: Plastic Injection Molding Service is produced in Guangdong, China.

Q: What materials are used to produce Plastic Injection Molding Service?

A: Plastic Injection Molding Service is typically produced in various engineering-grade thermoplastics.

Q: What is the lead time for Plastic Injection Molding Service?

A: The lead time for Plastic Injection Molding Service depends on the complexity of the product and the volume of the order.
