

## High Precision MIM Plastic Injection Molding Service Custom

Our Product Introduction

For more products please visit us on [lathecnrmachining.com](http://lathecnrmachining.com)

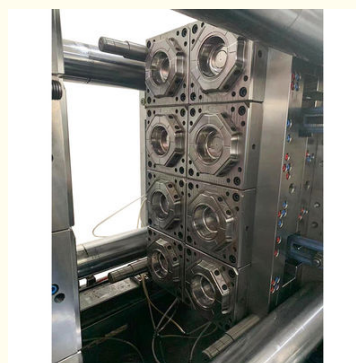

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Model Number: OEM
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-30 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

### Product Specification

- Metal Material: Aluminum, Brass, Bronze, Copper, Steel...
- Name: Plastic Injection Molding Service
- Surface Treatment: Polishing, Painting, Andozing, Silkscreen, Sandblasting, Texture
- Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
- Keyword: Automotive, Medical, Digital Prototyping, Appliance Prototyping
- Application: Prototype Development, Low-Volume Production & Rapid Tooling
- Highlight: **High Precision Plastic Injection Molding Service , MIM Plastic Injection Molding Service , custom plastic injection molding MIM**

### Product Description

**Product Description:**

Our Product Introduction

Plastic Injection Molding Service is a general purpose injection molding system specifically designed for custom plastic injection molding. It is a perfect solution for prototype development, low-volume production and rapid tooling. It is capable of providing high-precision injection molded parts in a fast and cost-efficient manner. The injection mold engineering process allows the system to produce parts with complex geometries, tight tolerances and intricate details. The injection molding process also ensures that parts are produced with high-quality surface finish. This Plastic Injection Molding Service is ideal for producing parts of various sizes, shapes and materials with high precision and accuracy. It is capable of producing parts from various materials such as ABS, nylon, polycarbonate, polypropylene, polystyrene and other thermoplastics. The system can also be used to produce parts with complex geometries, tight tolerances, intricate details and superior surface finish. In addition, it is capable of producing parts with high dimensional accuracy and repeatability for applications in industries such as automotive, aerospace, medical and consumer products.

## Features:

**Product Name:** Plastic Injection Molding Service

**Color:** Up To Your Decision

**Place of Origin:** Guangdong, China

**Metal Material:** Aluminum, Brass, Bronze, Copper, Steel...

**Application:** Prototype Development, Low-Volume Production & Rapid Tooling

**Model Number:** Sheet Metal Automotive Stamping Machining

**Injection Mold Engineering**

**General Purpose Injection Molding System**

**General Purpose Injection Molding System**

## Technical Parameters:

Parameter	Value
Tolerance	0.01
Micro Machining or Not	Micro Machining
Surface treatment	Polishining, Painting, Andozing, Silkscreen, Sandblasting, Texture
Metal Material	Aluminum, Brass, Bronze, Copper, Steel...
Type	Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
Service	CNC Plastic/Metal Prototype Machining, Injection Molding Process
Brand Name	Industrial Man
Color	Up To Your Decision
Application	Prototype Development, Low-Volume Production & Rapid Tooling
Name	Plastic Injection Molding Service
General Purpose Injection Molding System	Yes
Injection Molded Plastic Parts	Yes
Custom Plastic Injection Molding	Yes

## Applications:

Industrial Man's Plastic Injection Molding Service is an end-to-end solution for all your customization needs. Our OEM model number and brand name provide an assurance of quality, enabling you to confidently produce prototype development, low-volume production and rapid tooling. Our injection mold engineering and injection mold tooling are always of the highest quality and precision, so you can trust in our service for your most demanding projects. Our plastic injection molding is ideal for a wide variety of materials, including high temperature plastics and elastomers. We also offer a comprehensive range of other services such as custom plastic injection molding, mold flow analysis, and rapid prototyping.

At Industrial Man, we are dedicated to providing quality and precision in our plastic injection molding service. We strive to ensure that each project is completed within the specified timeline and to the highest standards. With our state-of-the-art technology and experienced team of professionals, you can be sure that your product will be delivered with the utmost accuracy and precision. Our molding services can accommodate all types of plastic materials, including highly temperature plastics and elastomers. Our micro machining capabilities enable us to produce parts with tight tolerances and a high level of accuracy. We also offer a range of other services such as custom plastic injection molding, mold flow analysis, and rapid prototyping.

Industrial Man's Plastic Injection Molding Service is the perfect solution for those who need high precision plastic injection molding services. Our experienced team of engineers and technicians are dedicated to providing the highest quality service and ensuring that each project is completed on time and to the highest standards. Our state-of-the-art technology and molding services can accommodate all types of plastic materials and our micro machining capabilities enable us to produce parts with a high level of accuracy and tight tolerances. With our plastic injection molding service, you can be sure that your product will be delivered with the utmost accuracy and precision.

## Customization:

Custom Plastic Injection Molding Service from Industrial Man

Industrial Man provides custom plastic injection molding services with model number Sheet Metal Automotive Stamping Machining. Our services are available in Guangdong, China. We are capable of providing a wide variety of services including broaching, drilling, etching / chemical machining, laser machining, milling, other machining services, turning, wire EDM, rapid prototyping, and CNC plastic/metal prototype machining. The color of the product is up to your decision and micro machining is available.

We specialize in injection mold tooling and custom plastic injection molding. Our team of experts will work with you to design and manufacture custom plastic injection molds that meet your exact needs and specifications.

## Support and Services:

Plastic Injection Molding Service

Technical Support and Service

At Plastic Injection Molding Service, we offer comprehensive technical support and service for our customers. Our highly trained staff can provide valuable assistance in all aspects of the plastic injection molding process, including:

**Design and engineering support**

**Prototyping and testing**

**Material selection and optimization**

**Mold design and fabrication**

**Injection molding and finishing**

**Assembly and packaging**

**Delivery and logistics**

We are committed to providing our customers with the highest quality products and services, and our technical support and service team is always available to answer questions and provide assistance. Contact us today to learn more about our plastic injection molding services.

## Packing and Shipping:

Packaging and Shipping for Plastic Injection Molding Service

We employ the best packaging and shipping methods to ensure that our plastic injection molding services are safely delivered to our customers. Our packaging and shipping procedures include:

**Using strong and durable packaging materials to ensure protection during transit.**

**Packaging of each product or order individually for easy identification and tracking.**

**Using shipping carriers with proven track records for reliability and safety.**

**Sending a tracking number to customers after shipment.**

**Working with select freight forwarding companies to provide the most cost-effective and reliable shipping services.**

## FAQ:

Q: What is Plastic Injection Molding Service?

A: Plastic Injection Molding Service is a manufacturing process for producing parts from both thermoplastic and thermosetting plastic materials. Industrial Man's Plastic Injection Molding Service provides high-quality and precision plastic parts that are ideal for a variety of applications.

Q: What is the Brand Name and Model Number of Industrial Man's Plastic Injection Molding Service?

A: The Brand Name is Industrial Man and the Model Number is OEM.

Q: Where is Industrial Man's Plastic Injection Molding Service manufactured?

A: Industrial Man's Plastic Injection Molding Service is manufactured in Guangdong, China.

Q: What materials can be used with Industrial Man's Plastic Injection Molding Service?

A: Industrial Man's Plastic Injection Molding Service can be used with both thermoplastic and thermosetting plastic materials.

Q: What are the benefits of using Industrial Man's Plastic Injection Molding Service?

A: Industrial Man's Plastic Injection Molding Service provides high-quality and precision plastic parts that are ideal for a variety of applications. It is also cost-efficient and can produce large quantities of parts quickly and accurately.
