

OEM Plastic Prototype Manufacturing Precision Injection Molding Inc

Our Product Introduction

For more products please visit us on lathecnrmachining.com

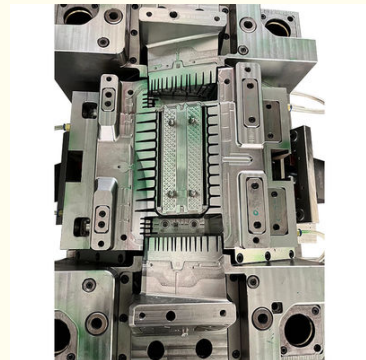

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Model Number: OEM
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-30 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Metal Material: Aluminum, Brass, Bronze, Copper, Steel...
- Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
- Color: Up To Your Decision
- Application: Prototype Development, Low-Volume Production & Rapid Tooling
- Micro Machining Or Not: Micro Machining
- Tolerance: 0.01
- Surface Treatment: Polishing, Painting, Anodizing, Silkscreen, Sandblasting, Texture
- Highlight: **OEM plastic prototype manufacturing, plastic prototype manufacturing Inc, OEM precision injection molding inc**

Product Description

Product Description:

Our Product Introduction

Plastic Injection Molding Service is a custom plastic injection mold and general purpose injection molding system, crafted by experienced machinists from Guangdong, China. It is specialized in providing high-precision and micro-machining services, including broaching, drilling, etching/chemical machining, laser machining, milling, other machining services, turning, wire EDM and rapid prototyping. The product is well-known for its quality and precision, and it is the perfect choice for any plastic injection molding project. The Plastic Injection Molding Service can be used to create custom plastic injection mold tools with a high level of accuracy. It is designed to provide high-precision, high-quality and cost-effective solutions for a wide range of applications. The product is ideal for the production of injection molds for a variety of applications, ranging from automotive parts, medical supplies, and consumer products. The product is also suitable for general purpose injection molding systems, which are used in industrial and commercial applications. The Plastic Injection Molding Service is designed to provide the maximum level of performance and reliability. It is built with the latest technologies to ensure that it can meet the highest standards. The product is also designed to be easy to use and maintain, as it can be operated manually or through a remote control. The product is designed to be cost-effective, as it can be used for a variety of applications without requiring a large investment. The Plastic Injection Molding Service is the perfect choice for any plastic injection molding project. It is designed to provide the highest level of performance and reliability, and it is built to last. The product is designed to provide the maximum level of accuracy and precision, and it is the perfect choice for any plastic injection molding project.

Features:

Product Name: Plastic Injection Molding Service

Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping

Keyword: Automotive, Medical, Digital Prototyping, Appliance Prototyping

Application: Prototype Development, Low-Volume Production & Rapid Tooling

Model Number: Sheet Metal Automotive Stamping Machining

Tolerance: 0.01

Custom Plastic Injection Mold: Yes

Injection Mold Tooling: Yes

Injection Molded Plastic Parts: Yes

Automotive Plastic Parts: Yes

Plastic Injection Molding Service: Yes

Technical Parameters:

Property	Description
Metal Material	Aluminum, Brass, Bronze, Copper, Steel...
Service	CNC Plastic/Metal Prototype Machining, Injection Molding Process
Type	Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
Place of Origin	Guangdong, China
Color	Up To Your Decision
Keyword	Automotive, Medical, Digital Prototyping, Appliance Prototyping
Name	Plastic Injection Molding Service
Brand Name	Industrial Man
Surface treatment	Polishing, Painting, Anodizing, Silkscreen, Sandblasting, Texture
Model Number	Sheet Metal Automotive Stamping Machining
Custom Service	Custom Plastic Injection Molding, General Purpose Injection Molding System, Custom Plastic Injection Molding Service

Applications:

Industrial Man provides high precision **Plastic Injection Molding** services for a wide range of industries, including automotive, commercial, medical, and consumer products. Industrial Man's plastic injection molding services are designed to meet the most demanding requirements for precision, accuracy, and repeatability. Our state-of-the-art injection mold tooling service provides high-quality prototypes and production parts with superior surface finishes.

Industrial Man's injection molding capabilities include a general-purpose injection molding system that can produce parts with extremely tight tolerances and high precision. The system is capable of producing parts with complex geometries and intricate details. Our injection molding process can be used to produce parts with a variety of materials, including aluminum, brass, bronze, copper, steel, and other metals.

The injection molding process is highly customizable and versatile, allowing for a wide range of surface finishes such as polishing, painting, anodizing, silkscreen printing, sandblasting, and texturing. Our experienced team of engineers and technicians are able to work with you to create parts that meet your specifications. We also offer custom colors to provide products with a unique look and feel.

Industrial Man is committed to providing customers with high-quality **Plastic Injection Molding** services with our brand name **Industrial Man**. Our **Sheet Metal Automotive Stamping Machining** services are designed to meet the most demanding requirements for precision, accuracy, and repeatability. Industrial Man's injection mold tooling service provides high-quality prototypes and production parts with superior surface finishes.

Customization:

Custom Plastic Injection Molding Service

Brand Name: Industrial Man

Model Number: OEM

Place of Origin: Guangdong, China

Color: Up To Your Decision

Surface Treatment: Polishing, Painting, Anodizing, Silkscreen, Sandblasting, Texture

Name: Plastic Injection Molding Service

Tolerance: 0.01

Metal Material: Aluminum, Brass, Bronze, Copper, Steel...

Support and Services:

Plastic Injection Molding Service provides technical support and services to help customers create plastic parts for their projects. Our experienced team of engineers will provide design-to-manufacturing services for all types of plastic injection molding projects. We can provide guidance on material selection, part design, tooling design and manufacturing, and process validation. We offer a wide range of services to ensure that your projects are completed on time and within budget. Our services include:

Design and engineering services

3D printing and prototyping

Mold making and tooling

Injection molding

Assembly and packaging

Quality assurance

Our team of experts is available to provide assistance with any stage of your project. We are committed to providing the best customer service and highest quality product for your injection molding projects.

Packing and Shipping:

Plastic Injection Molding Service Packaging and Shipping:

The goods are packaged in corrugated boxes, bubble wrap and/or foam packaging to ensure secure transportation. The goods are shipped via UPS, FedEx, DHL, and other reliable shipping services.

FAQ:

Q:What is Plastic Injection Molding Service?

A:Plastic Injection Molding Service is a manufacturing process for producing parts by injecting molten material into a mold.

Industrial Man provides OEM Plastic Injection Molding Service with high quality and competitive price.

Q:What are the advantages of Plastic Injection Molding Service?

A:Plastic Injection Molding Service has many advantages, including high production capacity, low labor costs, low scrap rates, and the ability to produce complex parts with precise dimensions and high accuracy.

Q:What material can be used for Plastic Injection Molding Service?

A:Industrial Man provides Plastic Injection Molding Service with a wide range of materials, such as ABS, PC, PP, PA, POM, PE, PBT, PA6, etc.

Q:What brand is Industrial Man's Plastic Injection Molding Service?

A:Industrial Man's Plastic Injection Molding Service is of the brand name Industrial Man, with model number OEM.

Q:Where is Industrial Man's Plastic Injection Molding Service from?

A:Industrial Man's Plastic Injection Molding Service is from Guangdong, China.
