CNC Machining Silicone Vacuum Casting Products IGS STP STL Drawing Format

Basic Information

• Place of Origin: Guangdong, China • Brand Name: INDUSTRIAL-MAN

IATF 16949: 2016/ISO 9001:2015 · Certification:

• Model Number: OEM 1PC • Minimum Order

Quantity:

• Price: Negotiable

• Packaging Details: As the requirement of customer

• Delivery Time: 3-7 work days

• Payment Terms: L/C, D/A, D/P, T/T, Western Union,

MoneyGram

500Pcs/ Month • Supply Ability:

Product Specification

• Drawing Format: IGS STP STL

• Type: Broaching, DRILLING, Laser Machining,

Milling, Turning, Wire EDM, Rapid

Prototyping

• Equipment: **CNC Machining Vacuum Cating**

0.01- +/-0.005mm • Tolerance:

• OEM/ODM: Avaliable

• Surface Treatment: Customer's Request

• Highlight: **CNC Silicone Vacuum Casting,**

IGS Silicone Vacuum Casting, IGS vacuum casting products

Product Description

Product Description:

Vacuum Casting Metal, developed by INDUSTRIAL-MAN, is an advanced prototyping process that has been designed for producing complex metal parts with precision. This process utilizes a vacuum pressure chamber to guarantee the highest quality castings and perfect replication of the original design. Vacuum Casting Metal is ideal for producing small metal parts with complex shapes, and is especially suitable for producing parts with intricate details and thin walls. It also offers excellent dimensional accuracy and repeatability, with tolerance of 0.01- +/- 0.005mm.

Vacuum Casting Metal can be used to produce parts with a variety of complex shapes, and is suitable for a wide range of materials such as copper, aluminum, stainless steel, and titanium. It supports a variety of drawing formats including IGS, STP, and STL, and can be used for a variety of machining operations such as broaching, drilling, laser machining, milling, turning, and wire EDM. The process is also customizable, and OEM/ODM services are available.

Vacuum Casting Metal offers a cost-effective and time-efficient manufacturing solution for producing complex metal parts with precision. It is ideal for producing small parts with intricate details, thin walls, and complex shapes, and offers excellent dimensional accuracy and repeatability. With its superior quality and wide range of capabilities, Vacuum Casting Metal is the perfect choice for producing complex metal parts with precision.

Features:

Product Name: Vacuum Casting Metal Drawing Format: IGS STP STL

OEM/ODM: Avaliable

Certification: IATF 16949: 2016/ISO 9001:2015 Surface treatment: Customer's Request

Tolerance: 0.01- +/-0.005mm

Process: Vacuum Investment Casting, Vacuum Assisted Casting, Vacuum Pressure Casting

Technical Parameters:

Parameter	Description
Туре	Broaching, DRILLING, Laser Machining, Milling, Turning, Wire EDM, Rapid Prototyping, Vacuum Formed Metal, Vacuum Investment Casting, Vacuum Pressure Casting
Tolerance	0.01- +/-0.005mm
Drawing Format	IGS STP STL
Equipment	CNC Machining Vacuum Cating
Certification	IATF 16949: 2016/ISO 9001:2015
Surface Treatment	Customer's Request
OEM/ODM	Avaliable
Brand Name	INDUSTRIAL-MAN

Applications:

INDUSTRIAL-MAN's Vacuum Formed Metal products are ideal for businesses looking for a cost-effective way to create intricate metal components for use in a variety of applications. The Vacuum Casting Metal process allows for precise and intricate details, making it ideal for creating intricate components with complex geometries. The Vacuum Investment Casting process is also more accurate than other forms of metal casting, resulting in parts with superior surface finishes and tight tolerances. With CNC Machining, surface treatments, and a tolerance of 0.01- +/-0.005mm, INDUSTRIAL-MAN's Vacuum Metal Casting products are ideal for businesses needing high-quality components that fit their exact specifications. Drawing formats such as IGS STP STL can also be accommodated. Vacuum Formed Metal products provide businesses with a reliable and cost-effective solution to creating components with complex geometries, superior surface finishes, and tight tolerances.

Customization:

INDUSTRIAL-MAN provides custom metal casting services through the Vacuum Casting Process, Vacuum Pressure Casting, and Vacuum Metal Casting. Our custom metal castings are of high quality and precision, with a Model Number of OEM and a Tolerance of 0.01- +/-0.005mm. We offer a wide range of surface treatments, including but not limited to anodizing, plating, polishing, and painting, to meet the customer's request. We also provide OEM/ODM services.

Support and Services:

Vacuum Casting Metal Technical Support and Services

We provide technical support and services for Vacuum Casting Metal. Our team is available to answer all your questions about the product, its features and functions. We will also provide assistance for installation, maintenance and troubleshooting. We offer customised solutions based on your specific requirements. Our services include on-site support and remote assistance, software updates, and warranty support. We also provide training and consulting services to help you get the most out of your Vacuum Casting Metal product.

We will ensure that you have the best experience possible when using Vacuum Casting Metal. Our technical support team is available 24/7 to answer your questions and help you resolve any issues you may encounter.

Packing and Shipping:

Vacuum Casting Metal products should be packaged and shipped in accordance with the following instructions: Package the product in a heavy-duty, corrugated box.

Make sure the box is sealed securely with tape. Include shock-absorbent material inside the box. Label the box with "Fragile" and "Handle With Care". Use an insured and traceable shipping method.

FAQ:

- Q: What is Vacuum Casting Metal?
- A: Vacuum Casting Metal is a metal casting process that uses a mold and a vacuum to create precision parts. This process can be used to produce parts with excellent surface finish and tight tolerances.
- Q: What is the brand name of Vacuum Casting Metal?
- A: Vacuum Casting Metal is manufactured by Industrial Man.
- Q: What is the model number of Vacuum Casting Metal?
- A: The model number of Vacuum Casting Metal is OEM.
- Q: Where is Vacuum Casting Metal made?
- A: Vacuum Casting Metal is made in Guangdong, China.
- Q: How does Vacuum Casting Metal work?
- A: Vacuum Casting Metal works by using a mold and a vacuum to create precision parts. The mold is filled with liquid metal and the vacuum is used to draw the air out of the mold. This allows the metal to fill the mold and create a precise part.
