

Rapid Tooling Plastic Injection Moulding Services Prototyping

Our Product Introduction

For more products please visit us on lathecnmachining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Certification: IATF 16949: 2016/ISO 9001:2015
- Model Number: OEM
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-30 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Keyword: Automotive, Medical, Digital Prototyping, Appliance Prototyping
- Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
- Metal Material: Aluminum, Brass, Bronze, Copper, Steel...
- Micro Machining Or Not: Micro Machining
- Surface Treatment: Polishing, Painting, Anodizing, Silkscreen, Sandblasting, Texture
- Application: Prototype Development, Low-Volume Production & Rapid Tooling
- Color: Up To Your Decision
- Highlight: **Rapid Tooling plastic injection moulding services**

Product Description

Product Description:

Our Product Introduction

Plastic Injection Molding Service is a one-stop solution to provide customized plastic parts and components with precision and accuracy. It is a type of machining service, with place of origin from Guangdong, China. With the combination of injection mold engineering and custom plastic injection molding, it is able to provide various services such as broaching, drilling, etching / chemical machining, laser machining, milling, other machining services, turning, wire EDM, and rapid prototyping. This service is ideal for prototype development, low-volume production, and rapid tooling in various applications such as automotive, medical, digital prototyping, and appliance prototyping.

Features:

Product Name: Plastic Injection Molding Service

Service: CNC Plastic/Metal Prototype Machining, Injection Molding Process

Place of Origin: Guangdong, China

Application: Prototype Development, Low-Volume Production & Rapid Tooling

Micro Machining or Not: Micro Machining

Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping

Injection Mold Engineering, Injection Molded Plastic Parts, Custom Plastic Injection Molding

Technical Parameters:

Parameter	Details
Surface treatment	Polishing, Painting, Andozing, Silkscreen, Sandblasting, Texture
Model Number	Sheet Metal Automotive Stamping Machining
Metal Material	Aluminum, Brass, Bronze, Copper, Steel...
Micro Machining or Not	Micro Machining
Application	Prototype Development, Low-Volume Production & Rapid Tooling
Name	Plastic Injection Molding Service
Keyword	Automotive, Medical, Digital Prototyping, Appliance Prototyping
Service	CNC Plastic/Metal Prototype Machining, Injection Molding Process
Place of Origin	Guangdong, China
Brand Name	Industrial Man
General Purpose Injection Molding System	Injection Mold Tooling, Custom Plastic Injection Molding, Rapid Prototype Injection Molding

Applications:

Industrial Man's Sheet Metal Automotive Stamping Machining is a perfect choice for high-quality injection mold tooling and general purpose injection molding system. This product is highly suitable for prototype development, low-volume production and rapid tooling due to its top notch performance and efficient functioning. It is made of premium quality metal material such as aluminum, brass, bronze, copper and steel etc. This product has been widely accepted by many customers due to its excellent and dependable service. It provides CNC plastic/metal prototype machining and injection molding process to ensure the highest quality of the injection molded plastic parts. Industrial Man's Sheet Metal Automotive Stamping Machining is highly reliable and cost effective. It has been developed with advanced technologies to provide the best performance and ensure the highest levels of quality and accuracy. It is suitable for a wide range of applications such as automotive parts, consumer electronics, medical devices, toys and more. It is easy to use and maintain and has been designed to provide maximum efficiency and reliability. Industrial Man's Sheet Metal Automotive Stamping Machining is the perfect choice for those who are looking for an efficient and reliable way of creating high-quality injection molded plastic parts.

Customization:

Industrial Man Plastic Injection Molding Service

Industrial Man offers professional custom plastic injection molding services for your precision parts and components. With our advanced injection mold tooling and general purpose injection molding system, we can produce high-quality injection molded plastic parts for your industrial, automotive, medical, and consumer products.

Our injection molding service is ideal for prototype development, low-volume production, and rapid tooling. We provide a wide range of surface treatments, such as polishing, painting, andozing, silkscreen, sandblasting, and texture, to meet your specific requirements. Our injection molding services are perfect for producing high-quality, precise, and reliable injection molded plastic parts. Contact us today to discuss your project needs and get a free quote!

Support and Services:

Plastic Injection Molding Service Technical Support and Service

At Plastic Injection Molding Service, we are dedicated to providing our customers with the highest quality technical support and service. Our highly trained and experienced team of technicians are available to provide assistance with all aspects of our plastic injection molding process, from initial product design to mold design and fabrication, as well as the injection molding itself. We also offer comprehensive troubleshooting and repair services.

We take pride in offering the best customer service possible. We are available to answer any questions you may have and are committed to providing timely and reliable solutions to any issues you may encounter. We strive to provide the best possible experience for our customers and are committed to helping them achieve their goals.

If you have any questions or need assistance with your injection molding project, please don't hesitate to contact us. We look forward to helping you with your injection molding project!

Packing and Shipping:

Plastic Injection Molding Service Packaging and Shipping:

The plastic injection molded parts are packaged in durable corrugated boxes.

Parts are placed in trays or cartons for additional protection and secure shipping.

Parts are shipped securely in robust packaging to ensure product quality and reliability.

FAQ:

Q1: What is Plastic Injection Molding Service?

A1: Plastic Injection Molding Service is a manufacturing process for producing parts from both thermoplastic and thermosetting plastic materials. It is provided by Industrial Man with OEM Model Number, and is originated from Guangdong, China.

Q2: What is the advantage of Plastic Injection Molding Service?

A2: The greatest advantage of Plastic Injection Molding Service is its ability to produce large quantities of the same parts very quickly and with high precision.

Q3: What type of materials can be used in Plastic Injection Molding Service?

A3: Plastic Injection Molding Service can be used with both thermoplastic and thermosetting plastic materials.

Q4: How long will it take to complete Plastic Injection Molding Service?

A4: The length of time required to complete Plastic Injection Molding Service may vary depending on the complexity of the design and the size of the production run.

Q5: Does Plastic Injection Molding Service have any limitation?

A5: Yes, Plastic Injection Molding Service is limited to the production of parts in the shape of the mold cavity. Parts with complex geometries or features, such as threads, may not be able to be produced with Plastic Injection Molding Service.
