

Automotive Plastic Injection Molding Service Plastic Prototype Manufacturing

Our Product Introduction

For more products please visit us on lathecnm machining.com

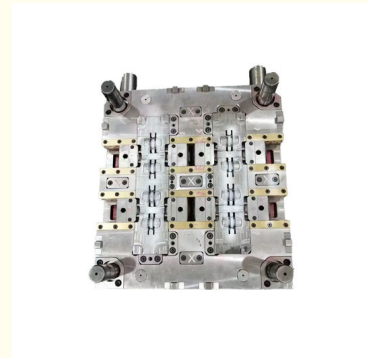

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Certification: ISO9001:2015
- Model Number: Sheet Metal Automotive Stamping Machining
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Surface Treatment: Polishining, Painting, Andozing, Silkscreen, Sandblasting, Texture
- Tolerance: 0.01
- Keyword: Automotive, Medical, Digital Prototyping, Appliance Prototyping
- Color: Up To Your Decision
- Name: Plastic Injection Molding Service
- Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
- Highlight: **Automotive Plastic Injection Molding Service, Prototype Manufacturing Plastic Injection Molding Service**

Product Description

Product Description:

Our Pr

Plastic Injection Molding Service is a high precision custom plastic injection molding service provided by our company. It is widely used in Automotive, Medical, Digital Prototyping, Appliance Prototyping and other industries. We can provide you with high quality injection molded parts with metal materials like aluminum, brass, bronze, copper, steel etc. Our injection mold tooling can guarantee high accuracy and repeatability. We provide services of custom plastic injection molding, injection mold tooling and design, mold flow analysis, and rapid prototyping. Our highly experienced engineers and technicians have excellent capabilities in design, manufacturing and assembly, making sure that each product meets customer's requirements.

Features:

Product Name: Plastic Injection Molding Service

Model Number: Sheet Metal Automotive Stamping Machining

Place of Origin: Guangdong, China

Name: Plastic Injection Molding Service

Tolerance: 0.01

Micro Machining or Not: Micro Machining

Custom Plastic Injection Molding

High Precision Plastic Injection Molding

Custom Plastic Injection Molding Services

Technical Parameters:

Name	Parameters
Name	Plastic Injection Molding Service
Place of Origin	Guangdong, China
Color	Up To Your Decision
Type	Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
Micro Machining or Not	Micro Machining
Tolerance	0.01
Brand Name	Industrial Man
Service	CNC Plastic/Metal Prototype Machining, Injection Molding Process
Application	Prototype Development, Low-Volume Production & Rapid Tooling
Model Number	Sheet Metal Automotive Stamping Machining
Custom Plastic Injection Mold	Yes
Injection Mold Engineering	Yes
Injection Mold Engineering Service	Yes

Applications:

Industrial Man's Plastic Injection Molding Service offers a comprehensive solution for all your prototype development, low-volume production and rapid tooling needs. Our injection mold tooling is made to the highest precision and quality standards, ensuring that your parts are produced accurately and efficiently. Our high precision plastic injection molding service is ideal for complex parts, tight tolerances, and challenging materials. We specialize in a wide range of automotive, medical, digital prototyping, and appliance prototyping needs. Our experienced team is committed to delivering high quality parts to your specifications, with a tolerance of 0.01. Our surface treatments include polishing, painting, anodizing, silkscreen, sandblasting and texture.

Industrial Man's Plastic Injection Molding Service provides high precision plastic injection molding and rapid tooling solutions for a variety of industries. Our experienced engineers and technicians are dedicated to providing the highest quality parts for your project. Whether you need injection mold tooling, high precision plastic injection molding, or high precision plastic injection molding service, Industrial Man is the perfect choice.

Customization:

Custom Plastic Injection Molding Service

Brand Name: Industrial Man

Model Number: Sheet Metal Automotive Stamping Machining

Place of Origin: Guangdong, China

Tolerance: 0.01

Service: CNC Plastic/Metal Prototype Machining, Injection Molding Process

Color: Up To Your Decision

Injection Mold Engineering: We offer custom Injection Mold Engineering services for the development of high-precision, complex plastic parts.

Custom Plastic Injection Mold: We provide custom plastic injection molding services for the production of high-quality plastic parts.

Support and Services:

Plastic Injection Molding Service Technical Support and Service

Our Plastic Injection Molding Service offers professional technical support and service. Our highly trained and experienced engineers are on hand to assist you with any issue you may have during the production process. We are committed to ensuring that your products are of the highest quality and are delivered on time. Our team of experts will work with you to assess your needs and develop a solution that is tailored to your specific requirements. We are dedicated to providing a customer-focused service that will ensure your complete satisfaction.

Packing and Shipping:

Our Plastic Injection Molding Service Packaging and Shipping are designed to protect the parts we produce from any potential damage. Each part is placed into a static dissipative bag and then placed into a corrugated box that is filled with packing peanuts. All of the boxes are then placed into a larger shipping box filled with packing peanuts to ensure maximum protection.

FAQ:

Q1: What is Plastic Injection Molding Service?

A1: Plastic Injection Molding Service is a process of manufacturing plastic products with Industrial Man's OEM model, which is produced in Guangdong, China.

Q2: What are the benefits of Plastic Injection Molding Service?

A2: Plastic Injection Molding Service provides high accuracy, repeatability and production rates, as well as high durability and cost-effectiveness.

Q3: What materials can be used for Plastic Injection Molding Service?

A3: Plastic Injection Molding Service can use a variety of thermoplastics, including polypropylene, ABS, polystyrene and polycarbonate.

Q4: What is the lead time of Plastic Injection Molding Service?

A4: The lead time of Plastic Injection Molding Service depends on the complexity of the product and the quantity of the order. Generally, it takes 5-10 days.

Q5: What is the tolerance of Plastic Injection Molding Service?

A5: The tolerance of Plastic Injection Molding Service is 0.02mm. It is able to produce parts with high accuracy.
