

ABS Polypropylene Plastic Injection Molding Service Engineering

Our Product Introduction

For more products please visit us on lathecnrmachining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Certification: ISO9001:2015
- Model Number: OEM

Product Specification

- Service: CNC Plastic/Metal Prototype Machining, Injection Molding Process
- Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Turning, Wire EDM, Rapid Prototyping
- Micro Machining Or Not: Micro Machining
- Application: Prototype Development, Low-Volume Production & Rapid Tooling
- Tolerance: 0.01
- Metal Material: Aluminum, Brass, Bronze, Copper, Steel...
- Highlight: **Polypropylene Plastic Injection Molding Service , ABS Plastic Injection Molding Service , polypropylene plastic injection molding Engineering**

Product Description

Product Description:

Our Product Introduction

Industrial Man provides plastic injection molding services to create precision-engineered plastic parts used in a variety of industries. Our injection molding system is a general purpose injection molding system, capable of producing high-quality injection molded parts with tight tolerances. We use advanced injection molding technology, injection mold engineering, and injection mold design to produce parts with the precision and accuracy required for your application.

Our injection molding services provide a cost-effective and efficient way to produce plastic parts. We can produce parts in a wide range of sizes, shapes, and materials. We have extensive experience working with a variety of materials including ABS, polypropylene, nylon, acrylic, polycarbonate, and more. We can also produce parts in multiple colors according to your specifications.

We offer a variety of finishing services including polishing, painting, anodizing, silkscreening, sandblasting, and texturing. We also offer CNC plastic and metal prototype machining services. Our experienced engineering team is ready to help you design and develop your injection molding project. We can also provide technical support and assistance with troubleshooting.

At Industrial Man, we have the expertise and experience to provide you with the highest quality injection molded plastic parts. Our injection molding system is designed to provide you with the best possible parts, with tight tolerances and superior strength. With our comprehensive services and experienced team, we can help you create the perfect injection molded parts for your application.

Features:

Product Name: Plastic Injection Molding Service

Application: Prototype Development, Low-Volume Production & Rapid Tooling

Surface treatment: Polishing, Painting, Andozing, Silkscreen, Sandblasting, Texture

Brand Name: Industrial Man

Metal Material: Aluminum, Brass, Bronze, Copper, Steel...

Model Number: Sheet Metal Automotive Stamping Machining

Custom Plastic Injection Molding

Injection Molded Plastic Parts

General Purpose Injection Molding System

Technical Parameters:

Attribute	Parameter
Model Number	Sheet Metal Automotive Stamping Machining
Tolerance	0.01
Application	Prototype Development, Low-Volume Production & Rapid Tooling
Metal Material	Aluminum, Brass, Bronze, Copper, Steel...
Color	Up To Your Decision
Keyword	Automotive, Medical, Digital Prototyping, Appliance Prototyping
Place of Origin	Guangdong, China
Brand Name	Industrial Man
Surface treatment	Polishing, Painting, Andozing, Silkscreen, Sandblasting, Texture
Micro Machining or Not	Micro Machining
Keyword	Injection Mold Tooling, Custom Plastic Injection Mold, Custom Plastic Injection Molding Service

Applications:

Industrial Man's custom plastic injection molding services provide a reliable and cost-effective solution to produce high quality plastic parts in a variety of automotive, medical, digital prototyping, and appliance prototyping applications. We offer a wide range of metal materials, including aluminum, brass, bronze, copper, and steel, and can provide a variety of machining services such as broaching, drilling, etching/chemical machining, laser machining, milling, turning, wire EDM, and rapid prototyping. We can also customize the color of your parts to meet your exact needs. Our team of experienced engineers and technicians can help you deliver the perfect custom plastic injection mold, custom plastic injection molding, and custom plastic injection molding service that you require. With our extensive experience and high quality standards, you can be sure that your project will be delivered on time and to the highest standards of quality.

Customization:

Industrial Man Custom Plastic Injection Molding Service

Brand Name: Industrial Man

Model Number: Sheet Metal Automotive Stamping Machining

Place of Origin: Guangdong, China

Micro Machining or Not: Micro Machining

Service: CNC Plastic/Metal Prototype Machining, Injection Molding Process

Name: Plastic Injection Molding Service

Industrial Man offers high precision custom plastic injection molding service for automotive, medical, industrial, electrical, home appliances, and other industries. Our experienced engineers and technicians can help you develop the most cost-effective plastic injection molding solution for your project.

We use the latest plastic injection molding technology to produce high quality, precision parts with tight tolerances that meet our customers' exact specifications. We specialize in custom plastic injection molding for a variety of materials, including ABS, PP, PA, PC, PBT, POM, PMMA, and more.

Our custom plastic injection molding services also include secondary operations such as machining, assembly, and testing to ensure that the parts meet our customers' exact requirements.

We are committed to providing our customers with the highest quality custom plastic injection molding services while maintaining competitive prices and fast lead times.

Support and Services:

At **Plastic Injection Molding Service**, we are dedicated to providing our customers with the highest quality technical support and service. Our team of experts are available to answer questions and help troubleshoot any issues that may arise. We offer a complete range of services including mold design, mold production, tooling, injection molding, and post-molding services. Our experienced technicians can guide you through the entire process, from concept to completion. We also provide training and education to help you understand the process and maximize the performance of your equipment. We are committed to providing our customers with the best possible service and support.

Packing and Shipping:

For Plastic Injection Molding Service, our packaging and shipping services are as follows:

We will use high-quality, sturdy packaging materials to protect your products during shipping.

We will ensure that your product is securely and carefully packaged to prevent damage during transit.

We will ship your product using reliable and secure shipping services.

We will provide tracking information for each shipment.

We will provide delivery confirmation to ensure that your product has arrived safely.

FAQ:

Q1: What is Plastic Injection Molding Service?

A1: Plastic Injection Molding Service is a process used to produce parts or components by injecting molten material into a mold. Industrial Man's Plastic Injection Molding Service uses high quality materials and advanced techniques to ensure precision injection molding and a high-quality, reliable product.

Q2: What brand of Plastic Injection Molding Service does Industrial Man offer?

A2: Industrial Man provides Plastic Injection Molding Service with a brand name of Industrial Man and a model number of OEM.

Q3: Where is Industrial Man's Plastic Injection Molding Service manufactured?

A3: Industrial Man's Plastic Injection Molding Service is manufactured in Guangdong, China.

Q4: What materials are used in Industrial Man's Plastic Injection Molding Service?

A4: Industrial Man's Plastic Injection Molding Service uses high quality materials and advanced techniques to ensure precision injection molding and a high-quality, reliable product.

Q5: How long does it take to get a Plastic Injection Molding Service from Industrial Man?

A5: The time it takes to get a Plastic Injection Molding Service from Industrial Man depends on the complexity and size of the product, but typically it takes between 5-10 days.
