

Precision CNC Machining Plastic Parts Aluminum Customized

Our Product Introduction

For more products please visit us on lathecnrmachining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial-Man
- Model Number: OEM
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Plastic Material: ABS, PP, POM, PC, Acrylic, Rubber, Foam, Nylon, Glass Fiber
- Metal Material: Aluminum, Brass, Bronze, Copper, Steel...
- Process: CNC Macining, Vacuum Casting...
- Micro Machining Or Not: Not Micro Machining
- Service: CNC Plastic/Metal Prototype Machining
- Surface Treatment: Polishining, Painting, Andozing, Silk Creening, Sanblasting, Texture
- Highlight: **Precision cnc machining plastic parts, Aluminum cnc machining plastic parts, Customized aluminum parts cnc machining**

Product Description

Product Description:

Our Pr

CNC Auto Parts is a specialized name for computerized components and automated machined parts. It is manufactured using CNC machining, vacuum casting, and other metalworking processes from materials like aluminum, brass, bronze, copper, and steel. It is made with precision and accuracy, providing excellent performance and durability. CNC Auto Parts is manufactured and supplied from Guangdong, China, ensuring that it is of top quality and can meet the needs of customers from different industries. In addition, CNC Auto Parts is cost-effective and can be customized to meet customer requirements.

Features:

Product Name: CNC Auto Parts

Place of Origin: Guangdong, China

Service: CNC Plastic/Metal Prototype Machining

Type: Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Rapid Prototyping, Turning, Wire EDM

Metal Material: Aluminum, Brass, Bronze, Copper, Steel...

Plastic Material: ABS, PP, POM, PC, Acrylic, Rubber, Foam, Nylon, Glass Fiber

Computerized Components, Digital Mechanical Parts, High-Precision Components

Technical Parameters:

Technical Parameter	Description
Micro Machining or Not	Not Micro Machining
Service	CNC Plastic/Metal Prototype Machining
Process	CNC Macining, Vacuum Casting...
Brand Name	Industrial-Man
Name	CNC Auto Parts
Application	Prototype Development, Low-Volume Production & Rapid Tooling
Metal Material	Aluminum, Brass, Bronze, Copper, Steel...
Type	Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Rapid Prototyping, Turning, Wire EDM
Equipment	CMM, CNC(5 Axis) Machines, CNC Mill & Turn & Lathe, Wire Cutter, RIM
Place of Origin	Guangdong, China
Keywords	CNC Automatic Parts, Digital Mechanical Parts, Computerized Components

Applications:

Industrial-Man CNC Auto Parts are designed to provide high-precision components for a wide range of digital mechanical parts, such as computer numerical parts. The parts are manufactured from a variety of materials, such as ABS, PP, POM, PC, Acrylic, Rubber, Foam, Nylon, and Glass Fiber. The parts are produced through a combination of CNC machining, Vacuum Casting and other advanced manufacturing processes, resulting in highly accurate and reliable components.

Industrial-Man CNC Auto Parts are widely used in industries such as automotive, aerospace, medical, and robotics. These parts are able to provide accurate and precise solutions to complex mechanical tasks, while also providing a long service life. These parts are also designed to be lightweight and durable, withstanding the toughest conditions and environments. Furthermore, these parts are designed to be easy to install and configure, making them suitable for a variety of applications.

Industrial-Man CNC Auto Parts are made to the highest standards of quality and precision, allowing for a smooth operation and reliable performance. With a wide range of materials and processes to choose from, these parts are designed to meet the needs of any application. From automotive to medical, Industrial-Man CNC Auto Parts provide the perfect solution for any application, offering superior performance and reliability.

Customization:

CNC Auto Parts Customization Services

Industrial Man provides high-precision CNC auto parts customization services. We provide a wide range of custom services, including digital mechanical parts, computerized components and other services. Our CNC auto parts are made with the highest level of precision and quality. We use CMM, CNC (5 Axis Machines), CNC Mill & Turn & Lathe, Wire Cutter, RIM, and other high-precision machines to ensure all parts are accurately machined.

We offer a variety of metal materials, such as aluminum, brass, bronze, copper, steel and more. We also provide a variety of services, including broaching, drilling, etching/chemical machining, laser machining, milling, other machining services, rapid prototyping, turning, wire EDM, and more. We also provide surface treatments such as polishing, painting, anodizing, silk screening, sand blasting, and texture.

Industrial Man provides high-precision components, digital mechanical parts and computerized components for CNC auto parts. We have a reliable team of professionals who make sure that every part is perfectly machined and delivered on time. Contact us now for more information about our CNC auto parts customization services.

Support and Services:

CNC Auto Parts provides technical support and service to ensure the highest quality of our product. Our team of dedicated technicians is available to answer any questions you may have regarding installation, operation, maintenance, and troubleshooting. We also offer a variety of online resources, such as user manuals, FAQs, and troubleshooting guides, to help you get the most out of your product. In addition, we offer technical support by phone, email, and live chat. Our technicians are available to help you with any issues or questions you may have. We strive to provide the most comprehensive support and service for our customers.

Packing and Shipping:

Packaging and Shipping of CNC Auto Parts

CNC Auto Parts are packaged and shipped to customers using the following methods:

Small parts are packed in plastic bags or boxes.

Larger parts are packed in cardboard boxes and secured with bubble wrap.

Parts are shipped using a variety of carriers, including USPS, FedEx, and UPS.

FAQ:

Q: What is the brand name of the CNC auto parts?

A: The brand name of the CNC auto parts is Industrial Man.

Q: What is the model number of the CNC auto parts?

A: The model number of the CNC auto parts is OEM.

Q: Where are the CNC auto parts manufactured?

A: The CNC auto parts are manufactured in Guangdong, China.

Q: What materials are the CNC auto parts made of?

A: The CNC auto parts are made of high-quality materials.

Q: What is the shipping time of the CNC auto parts?

A: The shipping time of the CNC auto parts is usually within 3-7 days.
