

## OEM Andozing CNC Precision Parts For Aerospace

Our Product Introduction

For more products please visit us on [lathecnmachining.com](http://lathecnmachining.com)

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Industrial Man
- Model Number: CNC Machining Aluminum
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

### Product Specification

- Micro Machining Or Not: Not Micro Machining
- Plastic Material: ABS, PP, POM, PC, Acrylic, Rubber, Foam, Nylon, Glass Fiber
- Service: CNC Plastic/Metal Prototype Machining
- Keyword: Automotive, Medical, Digital Prototyping, Appliance Prototyping
- Surface Treatment: Polishing, Painting, Andozing, Silk Creening, Sanblasting, Texture
- Process: CNC Macining, Vacuum Casting...
- Highlight: **Andozing cnc precision parts,**  
**OEM cnc precision parts,**  
**OEM cnc aerospace parts**

### Product Description

**Product Description:**

Our Product Introduction

Sheet Metal Welding Parts are designed for Metal Welded Parts and Sheet Metal Parts with excellent surface treatments, such as Polishing, Painting, Anodizing, Silk Screening, Sandblasting, and Texture. It is widely used for Prototype Development, Low-Volume Production and Rapid Tooling. With advanced process technology, such as CNC Machining and Vacuum Casting, the precise Sheet Metal Welding Parts are produced with superior CMM, CNC(5 Axis) Machines, CNC Mill & Turn & Lathe, Wire Cutter, RIM and other high-end equipment.

## Features:

Product Name: Sheet Metal Welding Parts  
Equipment: CMM, CNC (5 Axis) Machines, CNC Mill & Turn & Lathe, Wire Cutter, RIM  
Surface Treatment: Polishing, Painting, Anodizing, Silk Screening, Sandblasting, Texture  
Micro Machining or Not: Not Micro Machining  
Service: CNC Plastic/Metal Prototype Machining  
Name: Welded Sheet Metal Parts, Metal Welded Parts, Sheet Metal Parts

## Technical Parameters:

Keyword	Automotive, Medical, Digital Prototyping, Appliance Prototyping
Metal Material	Aluminum, Brass, Bronze, Copper, Steel...
Model Number	CNC Machining Aluminum
Type	Broaching, DRILLING, Etching / Chemical Machining, Laser Machining, Milling, Other Machining Services, Rapid Prototyping, Turning, Wire EDM
Surface treatment	Polishing, Painting, Anodizing, Silk Screening, Sandblasting, Texture
Plastic Material	ABS, PP, POM, PC, Acrylic, Rubber, Foam, Nylon, Glass Fiber
Name	Sheet Metal Welding Parts
Service	CNC Plastic/Metal Prototype Machining
Application	Prototype Development, Low-Volume Production & Rapid Tooling
Process	CNC Machining, Vacuum Casting...

## Applications:

Sheet Metal Welding Parts are products that are used in many different industries, from aerospace and automotive to furniture and medical products. They have become increasingly popular due to their versatility, durability and cost-effectiveness. These parts offer a range of features, including custom designs, low cost, and precise fabrication. Customized Aluminum CNC Machining Service is the perfect solution for producing high-quality sheet metal parts that can be tailored to meet specific requirements. It allows for a variety of shapes and sizes, while providing consistent results and repeatable accuracy. Customized Aluminum CNC Machining Service allows for the creation of custom-made sheet metal parts with high accuracy and repeatability. It is also suitable for large and complex parts, such as welded sheet metal parts, that require precise fabrication. The high accuracy of the CNC machining process allows for tight tolerances and the ability to produce parts with intricate details. CNC machines, such as CMM, CNC (5 Axis) Machines, CNC Mill & Turn & Lathe, Wire Cutter, and RIM, are used to create sheet metal parts with a variety of metal materials, including aluminum, brass, bronze, copper, and steel. Sheet Metal Welding Parts have become a popular choice for many industries due to their versatility, durability, and cost-effectiveness. With Customized Aluminum CNC Machining Service, you can create high-quality, custom-made sheet metal parts that are tailored to meet specific requirements. This service offers a range of features, including custom designs, low cost, and precise fabrication. With the use of CNC machines, you can create sheet metal parts with a variety of metal materials, while maintaining tight tolerances and intricate details.

## Customization:

Industrial Man provides custom sheet metal welding parts services to meet your project needs. We specialize in producing sheet metal products such as automotive parts, medical parts, digital prototyping, and appliance prototyping. We offer a variety of services including broaching, drilling, etching / chemical machining, laser machining, milling, other machining services, rapid prototyping, turning, and wire EDM. We use various plastic materials such as ABS, PP, POM, PC, acrylic, rubber, foam, nylon, and glass fiber. We are one of the top sheet metal products manufacturers in the industry. Our sheet metal welding parts are of the highest quality and can be used for a variety of purposes. Contact us today for more information.

## Support and Services:

We provide technical support and services for Sheet Metal Welding Parts. Our services include:  
Design and fabrication of custom sheet metal welding parts to meet customer requirements.  
On-site installation and maintenance services.  
Regular inspection and maintenance of sheet metal welding parts.  
Troubleshooting and repair services.  
Training and support for customers to use the sheet metal welding parts.

## Packing and Shipping:

Packing and Shipping for Sheet Metal Welding Parts:  
Sheet Metal Welding Parts should be packaged in either cardboard or plastic boxes.  
For long-distance shipment, it is recommended to use plastic boxes with a foam cushion inside for protection.  
For short-distance shipment, cardboard boxes are preferred due to their lighter weight.

The boxes should be marked with the product code and the customer's address.  
The shipment should be insured for any possible damage during the transport.

### FAQ:

---

Q1: What is Sheet Metal Welding Parts?

A1: Sheet Metal Welding Parts, manufactured by Industrial Man with model number OEM, is a high quality welding product made in Guangdong, China.

Q2: What is the application of Sheet Metal Welding Parts?

A2: Sheet Metal Welding Parts is widely used in the automotive, aerospace, agriculture and construction industries.

Q3: What materials are used for Sheet Metal Welding Parts?

A3: Sheet Metal Welding Parts can be made of aluminum, stainless steel, mild steel and other materials.

Q4: What is the range of sizes for Sheet Metal Welding Parts?

A4: Sheet Metal Welding Parts are available in a wide range of sizes, from small to large.

Q5: How long does it take to make Sheet Metal Welding Parts?

A5: It depends on the complexity of the design and the size of the order, but usually it takes 3 to 5 days to manufacture Sheet Metal Welding Parts.
