

MIM Metal Rapid Tooling Injection Molding Service Aluminum Brass Bronze

Our Product Introduction

For more products please visit us on lathecnm machining.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Customized Aluminum CNC Machining Service
- Certification: IATF 16949: 2016/ISO 9001:2015
- Model Number: CNC Machining Aluminum
- Minimum Order Quantity: 1PC
- Price: Negotiable
- Packaging Details: As the requirement of customer
- Delivery Time: 7-15 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000Pcs/ Month

Product Specification

- Application: Prototype Development, Low-Volume Production & Rapid Tooling
- Keyword: Automotive, Medical, Digital Prototyping, Appliance Prototyping
- Surface Treatment: Polishing, Painting, Anodizing, Silk Creening, Sandblasting, Texture
- Service: CNC Plastic/Metal Prototype Machining
- Metal Material: Aluminum, Brass, Bronze, Copper, Steel...
- Equipment: CMM, CNC(5 Axis) Machines, CNC Mill & Turn & Lathe, Wire Cutter, RIM
- Highlight: **MIM Metal Rapid Tooling Injection Molding , Bronze Rapid Tooling Injection Molding , Rapid Tooling mim metal injection**

Product Description

Product Description:

Rapid Tooling Injection Molding is a high-efficiency, cost-effective solution for prototype development, low-volume production, and rapid tooling. With our model number CNC Machining Aluminum, we offer a wide range of metal materials such as aluminum, brass, bronze, copper, and steel. Our services include various surface treatment options including polishing, painting, anodizing, silk screening, sandblasting, and texture. As a customized aluminum CNC machining service provider, we specialize in rapid prototyping injection molding, speedy prototyping injection molding, and rapid tooling injection molding. Our products are of the highest quality, efficient and reliable.

Features:

Product Name: Rapid Tooling Injection Molding

Brand Name: Customized Aluminum CNC Machining Service

Application: Prototype Development, Low-Volume Production & Rapid Tooling

Metal Material: Aluminum, Brass, Bronze, Copper, Steel...

Model Number: CNC Machining Aluminum

Keyword: Automotive, Medical, Digital Prototyping, Appliance Prototyping

Special Feature: Quick Tooling Injection Casting, Quick Tooling Injection Casting, Rapid Prototyping Injection Casting

Technical Parameters:

Parameter	Value
Keyword	Automotive, Medical, Digital Prototyping, Appliance Prototyping
Model Number	CNC Machining Aluminum
Brand Name	Customized Aluminum CNC Machining Service
Service	CNC Plastic/Metal Prototype Machining
Application	Prototype Development, Low-Volume Production & Rapid Tooling
Equipment	CMM, CNC(5 Axis) Machines, CNC Mill & Turn & Lathe, Wire Cutter, RIM
Surface treatment	Polishing, Painting, Anodizing, Silk Screening, Sandblasting, Texture
Metal Material	Aluminum, Brass, Bronze, Copper, Steel...
Quick Prototyping Injection Molding	Yes
Rapid Prototyping Injection Casting	Yes
Speedy Tooling Injection Molding	Yes

Applications:

Industrial Man's Rapid Tooling Injection Molding provides customers with cost-effective, quick prototyping injection casting and molding for prototype development, low-volume production and rapid tooling. The metal material used includes aluminum, brass, bronze, copper, steel and more. With the help of CMM, CNC (5 Axis) Machines, CNC Mill & Turn & Lathe, Wire Cutter and RIM, customers can get their orders done in a timely manner.

This product is great for those who need their prototypes completed quickly and efficiently. It also offers superior quality and accuracy, making it perfect for small-scale production. Furthermore, it is highly cost-effective, allowing customers to save money while still getting their desired results.

Industrial Man's Rapid Tooling Injection Molding is an ideal choice for those who require quick prototyping injection casting and molding services. It provides customers with a cost-effective solution for prototype development, low-volume production and rapid tooling. With its superior quality and accuracy, it is perfect for small-scale production. Additionally, it is highly cost-effective, allowing customers to save money while still getting their desired results.

Customization:

Rapid Tooling Injection Molding

Brand Name: Industrial Man

Model Number: OEM

Place of Origin: Guangdong, China

Service: CNC Plastic/Metal Prototype Machining

Surface treatment: Polishing, Painting, Anodizing, Silk Screening, Sandblasting, Texture

Metal Material: Aluminum, Brass, Bronze, Copper, Steel...

Keyword: Automotive, Medical, Digital Prototyping, Appliance Prototyping

Application: Prototype Development, Low-Volume Production & Rapid Tooling

Rapid Tooling Injection Molding: Rapid Prototyping Injection Casting, Quick Prototyping Injection Molding, Speedy Tooling Injection Molding

Support and Services:

Rapid Tooling Injection Molding Technical Support and Service

Rapid Tooling Injection Molding (RTIM) offers a wide range of technical support and services. Our experienced team of engineers and technicians can provide support with:

Design and tooling services

Material selection and injection molding

Manufacturing and production

Product testing and validation

Post-sales support and maintenance

We strive to provide the best possible service and support to ensure our customers are satisfied with their product. Our team is available to answer questions, provide advice, and troubleshoot any issues that may arise. We also offer online support and tutorials to help

customers get the most out of their RTIM product.

Packing and Shipping:

Rapid Tooling Injection Molding Packaging and Shipping:

The Rapid Tooling Injection Molding product is packaged and shipped in a cardboard box, and sealed with bubble wrap to ensure safety during transportation. The box is labeled with the product name, manufacturer name, and basic product description. The contents of the box are secured with foam, and the box is sealed with a tamper-proof seal.

FAQ:

FAQ about Industrial Man Rapid Tooling Injection Molding

Q1: What is the brand name of this product?

A1: The brand name of this product is Industrial Man.

Q2: What is the model number of this product?

A2: The model number of this product is OEM.

Q3: Where is this product manufactured?

A3: This product is manufactured in Guangdong, China.

Q4: What is Rapid Tooling Injection Molding?

A4: Rapid Tooling Injection Molding is a process of manufacturing components by injecting molten plastic materials into a mold. It is a cost-effective and efficient way to produce parts with complex geometries.

Q5: What are the advantages of using Rapid Tooling Injection Molding?

A5: The advantages of using Rapid Tooling Injection Molding include shorter lead times, cost savings, and better product quality. It is also capable of producing parts with complex geometries and fine details.
